Windows functions

	Open start menu
 M	Minimize all windows and show desktop
 F	Find
 E	Launch Explorer
 L	Lock computer
 R	Command (type winword for word, msexcel for excel, outlook or notepad)
Alt Enter	Open preferences

Explorer

↑↓	Navigate between folders
←→	Open and close folders
F2	Rename file
Delete	Move to trash
Shift Delete	Delete immediately (without trash)

Tips

- Modify the quicklaunch bar with the most used applications.
- Turn off Outlook notifications (that annoying beep and popup balloon when a new email arrives). Go to extra, options, e-mail options, advanced e-mail options. Uncheck all checkboxes under 'when new items arrive in my inbox'.
- Use the Alt key to activate menu items (followed by the underlined letter)
- Install Typepilot or Fingertips to automatically type reoccurring text

Which button is which

	Windows key
↑	Shift
Ctrl	Control
↑↓←→	Arrow keys

Custom keyboard shortcuts / your own

Keep shortcut tips from colleagues (or find them with the Google search term 'shortcut+application name').
